Personal data:
Names: Jose Luis
Lastname: Otero López
C.I.V: 19.708.951
Nationality: Venezuelan
Marital status: Single
Age: 26 years
Date of birth: 03 January of 1990
Phones: +58 0416 752 87 72

About Me:

Since 2008, I work as a developer with a wide experience in different frameworks PHP, as well as solid knowledge also in languages like Python, Ruby, additionally handling libraries of HTML5/CSS3 and Javascript, this has made me in Full Stack developer. I`m always in constant learning. I think that one day without learning something new is a day wasted, this brings me to each day have new challenges. I have flexibility in my work, I have learned over the years that there is more than one correct way to complete an objective, I always look through the adaptability to achieve my goals in the most efficient way. Crazy in Love of the technologies, i enjoy the good practices, agile methodologies and design patterns in applications, I have as an objective the development of sites with a clean structure, with a semantics correct. I like to travel. I enjoy the contact with nature.

Working as a Freelance gives me the possibility that a new job is a new enriching experience and at times a challenge that I will grow up as a person and as a professional.

My passions are to explore and investigate new areas. For me it is exciting the know of a new language or library.

My most recents works are: Developing Using Frameworks PHP: Yii Framework, Laravel, Symfony. Development of ApiRest Ful with authentication by token. Also developing and adapting for Wordpress themes.

My Phrase: "A day without learning something new is a lost day. Fork of Charlie Chaplin: "A day without laughter is a day wasted"
